## DETAILED ACTION

1. Applicant is advised that should claim 1 be found allowable, claim 19 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Britzke et al.

Britzke et al discloses the claimed invention as set forth below:

- An impeller table "16" as shown in Figure 4.
- A center feed body not enumerated in Figure 4.
- An impeller shoe "10" having a front face "22" as shown in Figure 1 the shoe connected by a support bracket "20" to table "16".
- The impeller shoe "10" having a convex shape as shown in Figure 1.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-15 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Adams in view of Bechler and Britzke et al.

Adams discloses the impact crusher substantially as set forth in claims 1-16. However, Adams does not disclose the wear resistant liner or the hard material insert rods. Bechler teaches, in the same field of endeavor, a wear resistant liner [Fig. 1, "86" and "118"] for the purpose of increased wear resistance throughout the comminuting chamber area and Britzke et al teaches, in the same field of endeavor the use of hard material insert rods [Fig.1, "44"] as an alternative means for increasing wear resistance in selected areas of an impact crusher.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Adams with a wear resistant liner for the purpose of increased wear resistance throughout the comminuting chamber as taught by Bechler and with the use of hard material insert rods as the means for increasing wear resistance in the selected areas of the impact crusher as taught by Britzke et al.

### ***Response to Arguments***

6. Applicant's arguments with respect to claims 1-17 and 19 have been considered but are moot in view of the new ground(s) of rejection.
